If a tree shares  
its seeds, fruits, and shade,  
it could be 'a forest.'  
This is the 'Sharing.'

## About Us

The Korea Safety, Health, and Environment (SHE) Foundation was established with the hope that the environment of our houses, workplaces, and communities should be as healthy, safe, and sustainable as forests.

Environment, safety, and health have been threatened with sudden changes in society in recent decades. These are closely linked with the sensitivity of citizens and directly related to the morality and public concern of the state and the society.

We believe in the virtue of "forest" and the power of "sharing." We will cultivate talents who can lead the future in the fields of environment, safety, and health. In order to solve the problems and find feasible alternatives, we will cooperate and communicate with various participants in our society.

### Issues we work on

Environment

Safety

Health

### Core value

Publicness

Expertise

Transparency

Independency

## What We Do

### We cultivate talented individual

#### - Research Scholarship -

We contribute to the development and practice of social values by cultivating future leaders and high potential individuals in the fields of environment, safety, and health in order to gain trust from the public society.

### We create ideas and propose alternatives

#### - Grants for Alternative Development Business -

We create alternatives and discourses about national and social problems.

We develop and suggest alternatives and discourses in order to solve the problems in the fields of environment, safety, and health in a scientific manner.

### We share concerns and solutions

#### - Cooperative Project -

We share the concerns in the community and provide solutions to the problems in the fields of environment, safety, and health. We help citizens to raise their awareness and solve problems in the fields of environment, safety, and health.

## Center for Working Environment Health

The Korea SHE Foundation and SK Hynix established Work · Environment · Health Center in Cheongju with an aim to alleviate the problems related to environment, safety, and health in the semiconductor industry and to make a safer and healthier workplace for the community.

Work · Environment · Health Center is the first private and public health center to reduce cases of occupational accidents by providing preventive health services to workers from small-scale companies, situated in more precarious working conditions.

### Address

212, East Bldg., Cheongju Techno S Tower, 530, Jikji-daero, Heungdeok-gu, Cheongju-si, Chungcheongbuk-do, Republic of Korea
